

Creating a Smart Session Using a Pre-Test

Purpose

A **Smart Session** using a pre-test determines whether a student sees only the regular Module One or a set of review lessons plus the regular Module One.

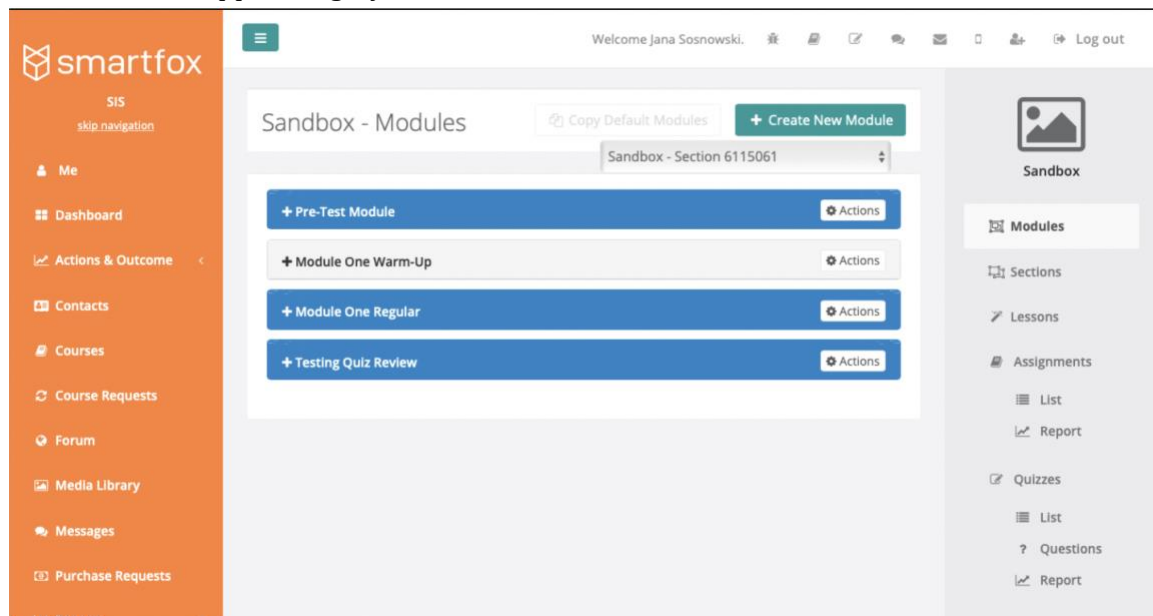

Step 1: Identify Key Components

Before building the modules, determine:

1. The pre-test and the percentage threshold that will trigger review lessons
2. All review lessons and quizzes
3. The content that will populate the regular module

Step 2: Understand Smart Sessions

Smart Sessions appear in gray within the LMS.

Sequence of Modules:

1. Place the Smart Session module immediately after the module that contains the trigger quiz.
2. After the Smart Session module, place the module that students who passed the trigger quiz will navigate to.

Example Flow:

- All students begin with the Pre-Test Module.
- Students below threshold → directed to Module One Warm-Up.
- Students at/above threshold → directed to Module One Regular.
- Students in the Warm-Up must meet a second threshold to exit the Smart Session.
- After completing the Smart Session, students continue to Module One Regular.
- All students leaving Module One Regular proceed to the Testing Quiz Review.

Step 3: Curriculum Considerations

- Balance workload: Split content between modules so students in Smart Sessions don't receive excessive extra work.
- Optional enrichment: Add optional application activities for students who advance immediately to the regular module.
- Time limits: Keep Smart Session content to about one hour.

Step 4: Set Up the Modules

First Module

Module Name
Pre-Test Module

Section
Sandbox - Section 6115061

Status
Published

Locked
No

Smart Session
No

Smart Pass Percentage
0

Alternate ID
0

Start Days
0

Description

Take this to chart your course.

Fill in the fields as follows:

Title: as needed

Section: as needed

Status: Published

Locked: No

Smart Session: No

Smart Pass Percentage: 0

Alternate ID: 0

Start Days: 0

Description: as needed

Second Module (Smart Session)

The screenshot shows the 'Edit Module' interface. The 'Module Name' field contains 'Module One Warm-Up'. The 'Section' dropdown is set to 'Sandbox - Section 6115061'. The 'Status' dropdown is set to 'Published', and the 'Locked' dropdown is set to 'No'. The 'Smart Session' dropdown is set to 'Yes', the 'Smart Pass Percentage' is set to '80', the 'Alternate ID' is set to '0', and the 'Start Days' is set to '0'. The 'Description' field contains the text: 'This module includes content to help with stuff you missed on the pretest.'

Fill in the fields as follows:

Title: as needed

Section: as needed

Status: Published

Locked: No

Smart Session: Yes

Smart Pass Percentage: 80

Note: This percentage is the score needed to advance out of the Smart Session once a student has been assigned to it.

Alternate ID: 0

Start Days: 0

Description: as needed

Important: The Smart Pass Percentage is calculated across all assessments in the module. No special settings are required on individual quizzes. For example, if set at 80%, the student must average 80% or higher across all assessments in the module.

Third Module (Regular Content for All Students)

The screenshot shows the 'Edit Module' form with the following values:

- Module Name:** Module One Regular
- Section:** Sandbox - Section 6115061
- Status:** Published
- Locked:** No
- Smart Session:** No
- Smart Pass Percentage:** 0
- Alternate ID:** 0
- Start Days:** 0
- Description:** This is the module you get if you pass the pre-test.

Fill in the fields as follows:

Title: as needed

Section: as needed

Status: Published

Locked: No

Smart Session: No

Smart Pass Percentage: 0

Alternate ID: 0

Start Days: 0

Description: as needed

Step 5: Set Up the Trigger Quiz

Edit Quiz

Quiz Name	Quiz for Smart Trial 4.05	Locked	No
Description	Trying out again.		
Password		Count towards grade earned?	Yes
Teacher	Jana Sosnowski	Question Appearance	Randomize Questions
No. of Questions	4	Time Limit (0 for no limit)	30
Passing Score	0	Allowed Retakes (0 for no retakes)	0
Quiz Score to Keep	Highest Score	Smart Threshold % (0 means off)	80
Smart Session Module	Module One Warm-Up	Status	Public
Start Date	Invalid date	Final Exam	No

Close Save

Fill in the fields as follows:

Quiz Name: as needed

Locked: No

Description: describe quiz

Password: blank

Count Towards Grade: Yes

Teacher: Name

Question Appearance: Randomize

Number of Questions: # of graded questions (for testing, use 2 or 4)

Time Limit: fill in

Passing Score: 0 (leave at 0 – this is for quiz reviews)

Allowed Retakes: fill in

Quiz Score to Keep: Highest

Smart Threshold: 80% (the score required to skip the Smart Session)

Smart Session Module: name of Smart Session module

Status: Public

Start Date: today's date

Final Exam: No

End Result: Students are directed to review lessons or regular content automatically, based on their pre-test performance, ensuring tailored learning paths without unnecessary extra work.
